Professional Experience

Iterari

(Mar 2019 - Currently)

The company develops customized software and mobile applications for various fields of activity. As a frontend developer, I developed several types of software, using tools such as: VUE JS, VUEX, VUE Router, React, JavaScript, CSS, TailwindCss, SASS, HTML and Kotlin. In addition to the knowledge acquired in Fronted Development, I also acquired basic knowledge in Backend, namely using tools such as PHP, Laravel and SQL. With this work I was able to acquire a complete view of the entire software development process.

In addition to working as a Fronted Developer, I also took on the role of Project Manager in several projects.

G3Tech

(Oct 2018 - Mar 2019)

The company is an advertising agency, which develops websites and software. I was hired to work in sales, a job I developed for a short time. I was quickly given the responsibilities of Project Manager.

This work allowed me to have the ability to understand which are the most efficient options in the software development process.

In addition, I also helped the company with the development of websites in Wordpress.

Intimissimi

(Jul 2016 - Aug 2017)

This part-time job in retail allowed me to develop several of my interpersonal and relationship skills as customers.

As the store was located in a tourist area, it allowed me to improve my communication in English a lot.
